GENERAL VALVE DESCRIPTION

Industrial Valve Manufacturer

Wafer/Lug/Double flanged concentric butterfly valves of Series 900 are resistant soft-sealing valves designed for industrial applications like:

- purification, treatment and distribution of potable or waste water, waste slurry treatment
- heating, heating water distribution
- ventilation, air conditioning
- conveying and distribution of sea and industrial water
- distribution of light chemicals, pharmaceuticals, oils and oil derivatives
- distribution of sugar juice, food industry applications
- conveying loose materials
- pulp and paper industry
- gas distribution
- dust or gas explosive environment (zones 0, 1; 20 and 21; except mining environment)

Basic properties

- concentric design, bidirectional
- wafer/lug type with split stem
- disc is moved by stem with diagonally fit square-end stem
- pivot plug enables to dismantle the valve (valid for wafer/lug valves up to DN 400), pin cover at DN 450-DN 600
- body long neck according to the regulations of thermoprocessing equipment
- red epoxy coating acc. RAL 2002-80 µm
- certified by DWGV for potable water and gas
- ABS certified - PED certificate
- ACS certification

Based on customers' special requests we offer:

- bonded seat - for vacuum systems with maximum absolute pressure of 200 mbar
- NBR conduct - ATEX design for group II, category 1 / 2 GD TX
- special seat types certified by FDA for food industry
- WRAS certification for potable water
- inspection certificates 3.1/3.2
- customer tailored valve design - special body or disc coatings, stem extensions for non-standard valve control etc.

Type designation

9 2 4 B

Body design

- B - Wafer body with through holes
 - T - Lug body with tapped holes
 - U - Double flanged body with short face-to-face length (ISO 5752, Series 20)
 - F - Double flanged body with long face-to-face length (ISO 5752, Series 13)
- * upon request the valve body can be coated with various types of special protecting coatings (Rilsan/Halar/A4 etc.)*

Disc material

- 0 - Brass 2.0402
 - 1 - Aluminium bronze 2.0975 (C95800)
 - 2 - Stainless steel 1.4308 (CF8)
 - 3 - Ductile iron 0.7040 (GGG40)*
 - 4 - Stainless steel 1.4408 (CF8M)*
 - 5 - HASTELLOY
 - 6 - Stainless steel 1.4539 (Uranus B6)
 - 7 - Titanium
- * upon request the disc can be coated with special coatings (Rilsan/Halar)*

Seat material

- 1 - NBR
 - 2 - EPDM
 - 3 - NBR Carboxyle (XNBR)
 - 4 - VITON (FPM)
 - 5 - Steam silicone (VMQ)
 - 6 - Silicone (VMQ)
 - 7 - Epichlorhydrin (ECO)
 - 8 - HYPALON® (CSM)
 - 9 - NBR 70-AG
 - NBR conduct
- * other materials upon request*

Quality control

- ABO valve production facilities are certified in accordance with ISO 9001:2015 (ISO 14001, 45001)
- tightness test procedures according to standards EN 12266-1, ISO 5208, ANSI/FCI 70-2
- production in accordance with the Pressure Equipment Directive 2014/68/EU (Module H)
- 3.1, 3.2 inspection certificates
- all the actuators are adjusted and tested while assembled
- manual actuator, if delivered, is adjusted and tested while assembled
- all the certificates can be downloaded from www.abovalve.com

For natural gas interflanged distribution systems

are offered gas versions valves of the Series 99xx. The gas valves are fitted with a control lever with a yellow sleeve. The valves are designed for natural gas, are supplied with a special set of seat with **DVGW** certification, tightness class A, working pressure max. 10 bar.

For distribution of potable water

are offered valves of Series 900 with special set of seats with **DVGW/WRAS** certification. The valves are designed for cold water, inc. potable water, tightness class A, working pressure 10/16 bar. The valves are equipped with control lever with a grey sleeve.

As a lightweight variant (valves with lower weight) are offered valves of Series 900 with aluminium body, working pressure 10/16 bar, working temperature: - 40 °C / +150 °C.

DESIGN ADVANTAGES

Industrial Valve Manufacturer

INTERFLANGED DESIGN

1. International standard compatibility

- according to the standard ISO 5211 top flange enables to directly mount any manual operators and actuators. Valve long neck enables to use insulation and protects control elements on the ISO flange. The design meets requirements on heating system control fittings.

2. Blow-out proof shaft system

- a retaining bolt disables a stem movement upwards

3. Splitted stem

- with the divided stem the valve reaches better Kv/Cv values and thus a low pressure loss.

4. Seat design

- seat profile in the body (groove and tongue system) prevents the seat to slip out from the body when the disc moves.

5. Dougle side profile

- enables to correctly fit the seat in the body

6. Groove shape

- the seat is inserted in the stem position inside the body profile to enable better support.

7. Demountable design

- enables to simply change the seal.

BODY SURFACE TREATMENT / SEAT ANCHORING

Body surface treatment

Epoxy coating

Standard ABO high quality epoxy coating system, complying with the C2 corrosion aggressiveness degree according to the standard ČSN EN ISO 12944-1, minimum coating thickness 80 µm.

Marine environment coating

Resistant coating suitable for marine environment or high corrosion risk environment. Available are variants resistant to corrosion aggressiveness grades C3, C4 and C5.

Rilsan

Highly resistant coating for very demanding applications of high flexibility, elasticity and excellent corrosion resistance. This coating option is recommended for applications such as seawater, cement, process water, food or media contaminated with chemicals.

Halar

Thermoplastic Fluoroplast coating to be installed in pipelines with aggressive media. The coatings of high chemical resistance are suitable also for joining material, sealing washers and similar.

Inter Zone 954

Coating provides superior protection in sea water environment. The coating is designed for bodies exposed to high humidity or other very arduous climate conditions. It is highly resistant to acid and solvent vapours and sprinkles, common and salt water.

Seat anchoring options

Groove/tongue

STANDARD

- groove/tongue system prevents seat movement
- reliability
- simple replacing seat

Vulcanized(bonded) seat

UPON REQUEST

- vulcanized seat is intended for use in vacuum and difficult operation conditions. For lower vacuum glued seat version can be used.

The seat is guiding and prevents anchored by **a groove/tongue system** enabling stable unwanted seat movement.

3-stage sealing system guarantees 100% tightness, long term product lifespan and safe operation in the most demanding applications.

1. Primary sealing

- sealing surface of the seat in the contact area with disc, stem and pivot has a precisely defined geometry

2. Secondary sealing

- secondary sealing is created by the stem and pivot disc overlap depending on the seat diameter

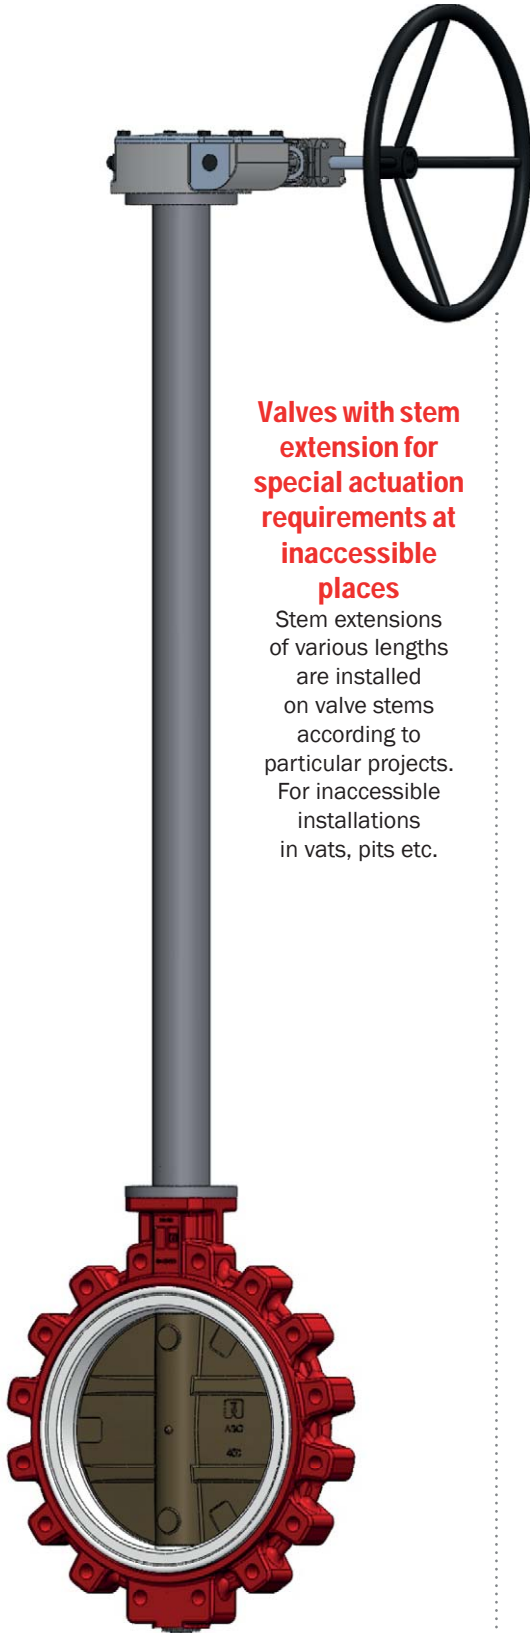

3. Tertiary sealing

- stems and pivots are equipped with safety O-rings that further enhance operational performance and reliability
- O-rings protect stem bearings against penetration of abrasive particles from environment

VALVES FOR SPECIAL PURPOSES

Industrial Valve Manufacturer

6 / ABO Valve Czech

Valves with stem extension for special actuation requirements at inaccessible places

Stem extensions of various lengths are installed on valve stems according to particular projects. For inaccessible installations in vats, pits etc.

Valves with lightened aluminium body

Light weight valve. Suitable for installations in plastic pipes (pools)

Valve discs with special coatings

Discs are coated with high resistant coatings for aggressive environment (Rilsan/Halar).

Aluminium bronze valve disc for seawater treatment systems

Specially designed for maritime and marine environment where a maximum product reliability is required in highly saline environment.

Polyurethane coated valve bodies

Specially designed for underground applications. Polyurethane coating protects the valve body against corrosion.

Valve with special lever and limit switches

Can be equipped with non-standard lever type (up to 10 position degrees). The disc position is scanned by limit switches connected to the valve stem.

Valve actuator installation according to customers' requirements

Standard - actuator on the side. Possibility to place valve actuator according the specific disposition or specific requirements.

VALVES FOR SPECIAL PURPOSES

ATEX design

For valves intended for explosive atmospheres i.e where explosive mixtures of gases, vapours, fog or dust are created. DVGW certification.

Valves with worm gear controlled by chain

Chain installed for worm gear control. The chain replaces handwheel. Suitable for inaccessible places.

Valves with FDA certified seats

For food industry. For potable water medium WRAS certification can be provided.

Valve with stem extension

Stem extensions are used in hard-to-reach places where there is no direct access to the valve.

Additional equipment for pneumatic actuators

Pneumatic actuators can be equipped with positioners, solenoids, limit switch boxes, etc.

Float valve

For installations in tanks/reservoirs. The float controls valve opening by the level height.

Valves with stainless flanges

Non-standard connection to pipelines. Connection flanges are screwed to the valve body.

SEATS / POSSIBLE APPLICATIONS

Industrial Valve Manufacturer

Industry	Medium	Marking	Seat material	Applications	Working temperature range
Water management Potable water treatment	Potable water	EPDM	DRINKING WATER EPDM (EPDM-018)	WRAS, ACS. Certified by DVGW GmbH (DVGW W 363-P).	-20 °C .. + 90 °C
Water management Potable water distribution / Heating	Potable water Heating water		DRINKING WATER EPDM-HT (EPDM-019)	For potable water purification, treatment and distribution - higher temperature resistance	-20 °C .. + 130 °C
Water management Potable water distribution / Food indust	Beverages Juices / Malt Hot service water		EPDM-HT*) (EPDM-022)	FDA certified. For sugar mills, beverage factories, malt houses. Seat colour - black.	-20 °C .. + 130 °C
Food industry	Beverages Juices Malt		EPDM-014 (FDA)	FDA certified - for lower tempetaure ranges. Seat colour - white. Corresponds to standard 1935/2004.	-10 °C .. + 90 °C
Chemical industry Ventilation Air conditioning Water treatment	Air Non-aggressive acids and alkalines Non-aggressive minerals Water distribution		EPDM-008/1	For distribution of non-aggressive mild mineral acids, air distribution - ventilation and air conditioning. Suitable for water treatment installations..	-20 °C .. + 90 °C
Water managment	Potable water	EPDM	EPDM-024 NSF61	For potable water purification, treatnet and distribution - higher temperature	-20 °C .. + 130 °C
Industrial production processes / Gas distribution Oil industry Petrochemi- stry Fuel processing Waste oils processing Fat sorting Loose materials conveying Cement and lime industry	Gas	NBR	DVGW-GAS NITRILE	Natural gas transport and distribution. Certificated by DVGW CERT GmbH	-10 °C .. + 90 °C
		NBR-X	CARBOXYLIC NITRILE	For oily media applications with brasive particles in transported media. FDA.	0 °C .. + 90 °C
	Abrasive media	FLUCAST	FLUCAST AB/N	For oily mediaainstallations - crude oil distribution	-0 °C .. + 90 °C
		FLUCAST	FLUCAST AB/P	For abrasive resistant applications - for „dry“ media like loose materials, powder media (gypsum, carbon black, china clay, oxides), pneumatic conveying of cement and powder in mining industry.	-10 °C .. + 70 °C
		FLUCAST	FLUCAST AB/T	For abrasive media with high temperature resistance.	-5 °C .. + 130 °C

*) **EPDM Super HT seat:** -10 °C .. +150 °C. This new EPDM Super HT seat has much better mechanical properties if we compare it to other rubber compounds used at high temperatures like silicones of fluorelastomers. In addition to being used for hot water, EPDM Super HT is also suitable for steam. Here it can replace f.e. steam silicone seat

Industry	Medium	Marking	Seat material	Applications	Working temperature range
Sea water treatment Water softening for industry in general Petrochemistry Fuel processing Biogas distribution	Salt water Biogas Crude oil Fuel	ECO	EPICHLORHYDRIN	For seawater, saltwater, gas/biogas, crude oil and fuel distribution applications.	-40 °C .. +90 °C
Chemical industry Recove- ry / Stem heating / Biogas distribution / System for production and distri- bution of pure steam	Steam Biogas Agressive acids Oils	FPM	VITON BIO	High fluorine contents, suitable for distribution of acids and oils, chemically resistance.	-5 °C .. +150 °C
			STANDARD VITON (FPM-002)		
Chemical industry Petrochemistry	Industrial grease Oils Non-agressive acids	CSM	HYPALON	Suitable for applications with standard rubber mixtures lifespan limited by action of high temperatures - distribution of oils, diluted acids and alka- lines.	-10 °C .. +100 °C
Chemical industry Recovery Steam heating Industrial pipelines for steam distribution	Steam	MVQ	HYPALON	For heat recovery, steam supply and distribution systems	-40 °C .. +150 °C
Food industry	Food steam	VMQ	FOOD SILICONE	Steam distribution systems with higher work temperatures, certified by FDA.	-40 °C .. +150 °C
Chemical industry Recovery Steam heating Industrial pipelines for steam distribution	Steam - high temperature ranges	VMQ	SILICONE	For media requiring higher temperature resistance at negative and positive work media temperatures (steam).	-40 °C .. +160 °C

*) possible alternatives of the seats with WRAS certification:

1. Material EPDM, type designation **YL-E-7010**, black color of the seat, for temperature ranges max. 60 °C.
2. Material EPDM, type designation **Sunaflex T 9635**, black color of the seat, for temperature ranges max. 85 °C.

VALVE ACTUATION

Industrial Valve Manufacturer

All the ABO valves can be equipped with hand levers, worm gears, pneumatic and electric actuators. The top flange design according to the standard ISO 5211 enables to directly assemble actuators on valves. Thus compatibility between valves and actuators is guaranteed.

Handlever

Dimensions are mentioned in mm, weight in kg.

For manual actuation ABO offers carbon steel lever suitably painted to improve resistance to corrosion, abrasion and shock. Stainless lever on request. Top flange connection according to ISO standards F05 for DN50 to DN65 and F07 for DN80 to DN200. Controlled lever upon request. The levers can be equipped with a lock to ensure an optimized position. The levers can be supplemented with limit switches.

Worm gear with handwheel

Manual gearbox casing is made from cast iron with suitable surface treatment and protection degree class IP 67. Self-locking design of the worm gear enables both to set basic positions open/shut and to control (throttle) media flow. The worm gearbox is simply controlled hand-wheel of a suitable diameter. End positions of the worm gearbox are adjusted by screws. The gearbox can be equipped with a lockable system secured by a padlock. The worm gearbox as well as the hand lever can be completed with limit switch boxes.

VALVE ACTUATION

Actuators

Pneumatic actuators

Pneumatic actuators ABO Series 95 can be assembled to valves in two options: single-acting or double-acting

Electric actuators

Electric drives ABO Series 97 are designed quarter-turn. Electric actuators can be installed on ABO valves for voltages of 24 V, 230 V or 400 V.

Special actuators types

Valves are equipped with special actuator types from major world suppliers (Auma, Regada, Valpes etc.).

electric actuator

pneumatic actuator

special actuators

Operating torques (Nm) vs working pressure (bar)

DN	32/40	50	65	80	100	125	150	200	250	300	350	400	450	500	600
p_{max} 6bar	8	11	15	20	38	55	70	100	160	235	480	750	1180	1380	2050
p_{max} 10bar	9	12	17	25	46	70	80	125	200	290	530	1200	1550	2050	2700
p_{max} 16bar	10	12	20	30	55	85	100	150	290	380	580	1650	2100	2700	3700

Mentioned torques are valid only for valves with EPDM seats and stainless discs for liquid media. For valve actuation the declared values must be multiplied by 1,2. For NBR seats to be multiplied by 1,4. For gas media or media with abrasive particles use secondary coefficient 1,35. For NBR and VITON (FPM) seats multiply by 1,4. For specific work conditions contact manufacturer to get advised the actuation type choice.

DN>600 / DOUBLE FLANGED DESIGN - SERIES „U”

Industrial Valve Manufacturer

Body design

Double flanged Body with threaded / tapped holes

Design performance

Series „U” Short face-to-face length, Series 20
According to ISO 5752-20

Nominal size

Design „U” DN700 - DN1600

Working pressure

1,0 MPa - 1,6 MPa (PN10 / PN16)

Leak test

1,1 MPa - 1,76 MPa

Working temperature

NBR -10 °C / +90 °C
Seat EPDM -20 °C / +125 °C *)

Features

Concentric design

Top flange according to ISO 5211
Flange connection according to BS4504/DIN/ANSI
Design complies with API609

*) other alternatives upon request

1. International

Standard compatibility

- according to the standard ISO 5211 the top flange enables to directly assemble any manual operators and actuators. Valves are usually delivered with worm gear actuators. A wide scale of pneumatic or electric actuators can be assembled, too.

2. Blow-out proof system

- a retaining washer disables shaft movement upwards.

3. Lengthened neck

- enables to insulate the actuator from conveyed media warm effects and thus meets requirements on heating systems controls

4. Seat design

- seat movement or incorrect position is impossible - seat can be vulcanized. Vulcanization leads to decreasing torque values needed to handle the valve. Valve inner part is fully rubber lined and thus protected against corrosive effects.

5. Disc design

- disc with polished edges is protective to seat and provides a long lifespan. Symmetric disc profile improves valve performance by increasing Kv (Cv) values, decreases turbulence and minimizes pressure loss

DN>600 / DOUBLE FLANGED DESIGN - SERIES „U“

Advantages of concentric shut-off valve double-flanged design

- 100 % tightness
- 0% leakiness
- vulcanized seat
- actuation by various actuator types - manual, electric, pneumatic or special types
- on/off and for regulation
- fully sealed stem, medium is not in contact with stem and body
- bi-directional tightness
- low body weight
- disc aerodynamic design minimising pressure loss
- disc with polished edges, high through put profile

Material options Body / Disc / Seat/ Shaft

Body	Grey cast iron / Ductile iron / Carbon steel / Stainless steel / Epoxy coating / Coating C4, C5
Disc	Ductile iron / Stainless steel / Aluminium Bronze / Duplex / Super Duplex / HC276 / RILSAN, HALAR coating
Seat	NBR / EPDM / EPDM for potable water/FPM/Silicone
Shaft	AISI420 / AISI431 / F51/ F55 or

VALVE ACTUATION Worm gearbox with handwheel

Manual gearbox casing is made from cast iron with suitable surface treatment and protection degree class IP 67. Self-locking design of the worm gear enables both to set basic positions open/shut and to control (throttle) media flow. The worm gearbox is simply controlled hand-wheel of a suitable diameter. End positions of the worm gearbox are adjusted by screws. The gearbox can be equipped with a lockable system secured by a padlock. The worm gearbox as well as the hand lever can be completed with limit switch boxes.

Actuators

Pneumatic actuators

Two standard designs: single-action/double-action.

Electric actuators

Electric actuators can be installed for voltages of 24 V, 230 V or 400 V

Special actuators types

Made by suppliers Auma, Regada, Valpes, etc

DN>600 / DOUBLE FLANGED DESIGN - SERIES „U”

Industrial Valve Manufacturer

Body design

Double flanged Body with through / threaded holes

Design performance

Increased face-to-face length, Series 13
Series „F” According to ISO 5752-13
